

## SHORTS

The shorts manufactured with modern methods of cutting-sewing, are elaborate and presentable. The manufacture is made with raw materials

**Sewing Thread** Thread of polyester (polyester core spun) high strength and quality, in the same colour to the fabric.

**Elastic** The elastic for the waist to be of good quality and 4.5 width cm.

**Braid** White nylon braid width 2-2,5 cm.

**Tag/label Marking** In each Pant internally at the back and at the height of the waist sewn small synthetic fabric label markings, mercerized of color white small size, on which would appear in indelible black ink markup elements

### **Manufacturing**

- The shorts are consisted of two (2) main sheets (one front and one back).
- The seams are done in a five clone serge with thread of good quality "Core Spun Polyester", in the same colour as the fabric.
- White nylon braid at the legs part to have width 2-2, 5cm and be rounded sewed at the lower end of the leg part
- All the seams on the edge, as well as the crotch inside, have fasteners (tacking).
- The opening on the side is 5cm.
